Perkins. 1657.

A New Almanack AND PROGNOSTICATION for the year of our Lord God 1657.

Being the first after Bissextile or Leapyear, And from the Worlds Creation 5621.

Composed, and chiefly referred to the famous City of *London*.

Made and set forth by *F. Perkins* Wellwiller to the Mathematicks.

LONDON
Printed by *R. I.* for the Company of STATIONERS 1657.

The common Notes and moveable Feasts according to the English Account, for this year, 1657.

The Golden Number	5
The Dominical Letter	D
Shrove Sunday	8 Febru.
Easter day	29 March
Rogation Sunday	3 May
Ascention day	7 May
Whitsunday	17 May.

Note, that the Roman account is alwayes ten daies before the English Account, so that their eleventh day is our first day, and our last day is their tenth day.

The Exchequer openeth eight daies before any Term begins, except the Term of Trinity, before which it openeth but four daies.

Observe that the first and last daies of every Term, are the first and last daies of Appearance.

A Perfect Table of the four Terms, and their Returns, with the Essoyn days, days of Exception, Returna brevium, and days of Appearance this year, 1657.

Hillary Term begins January 23. ends February 12.

Return dayes, or dayes of Essoyn.	Dayes of exception	Returna Brevium	Dayes of Appearance
Octabis Hillar. Ja. 20.	21	22	23
Quind. Hillary Ja. 27	28	29	30

Perkins. 1657.

A Prognostication for the year of our Lord God, 1657.

Being the first after Bissextile or *Leap-year*, and from the Worlds Creation, 5621.

Wherein is contained the description of the four quarters of the year: As also a Chronological Table of many things worth remembrance, since the Creation, until this present year, 1657. Collected for the most part out of Ecclesiastical History, and other good Authors, something augmented.

By F. Perkins, Well-willer to the Mathematicks.

Printed at *London* by *Robert White*, for the Company of Stationers, 1657.

BIBLIOTECA

A Deſcription of the four Quarters of the year, and firſt of Winter.

☉ in ♑ ♒ ♓.

According to the cuſtom of writers in this kind, Winter Quarter is the firſt Quarter, which took beginning the 11. day of December, 1656. at which time the Sun entred into the firſt degree of the cold and dry ſign Capricorn, being the moſt remote from us in his farthest South declination, cauſing the dayes with us to be ſhorteſt, and the nights longeſt: Which Quarter continuing until the Sun hath ſlowly paſſed through Capricorn, Aquarius, and Piſces. This Quarter doth naturally reſemble Old age.

Of the Spring.

☉ in ♈ ♉ ♊.

This Quarter doth take beginning the 10 of March, at which time the Sun entreth into the firſt minute of Aries, and doth continue whileſt the Sun is a paſſing through theſe 3 vernal ſigns, Aries, Taurus, and Gemini. This Quarter doth reſemble growing youth.

Of Summer.

☉ in ♋ ♌ ♍.

The Summer Quarter doth take his beginning when the Sun doth enter into the firſt degree of Cancer, which will be this year the 11 of June, and doth continue whileſt the Sun paſſeth through Cancer, Leo, Virgo; now are the dayes longeſt, and the ayr hotteſt; therefore, but for neceſsity, bid Phyſick Adieu.

Of Autumn.

☉ in ♎ ♏ ♐.

Autumn or Harveſt Quarter (commonly called the Fall of the Leaf, of ſome the latter Spring) doth begin when the Sun doth enter into the firſt degree of Libra, making again the day and the night of equal length: Which will be this year, the 12 of September, and doth continue whileſt the Sun doth paſs through Libra, Scorpio, and Sagittarius. This Quarter doth fitly reſemble declining age, and Phlegmatick complexion.

A

A brief Chronological Description of many things worthy of memory that have hapned since the Creation unto this present year of our Lord 1657. with the year of the World in which they hapned in the first Column, faithfully collected from many good Authors.

Of

Of the Eclipses this year 1657.

There will be four Eclipses this year: two of the Sun and two of the Moon, of which only those two of the Moon will be visible in England.

The first of these will be of the Sun upon Munday the 1 of June, but not visible to us.

The second visible of the Moon, upon Munday June 15. The beginning at 6 h. 39 m. middle at 8 h. 17 min. end at 10 h. 10 m.

This Eclipse will begin to be visible about the middle of it.

The third will be of the Sun, November 25 not visible.

The fourth will be of the Moon, Thursday the 10 of December. The beginning at 5 h. 43 m. Middle at 6 h. 51 m. end at 8 h. 0 m.

This will be visible from the beginning to the end, if the skie be clear.

Excellent Notes of Husbandry and Gardening for each Moneth in the Year.

January Observations.

In this moneth, cut down timber (and it shall not cleave nor be eaten with worms) in the last quarter of the Moon set or sow Kernels and Way-trees, Privet and Box, set Quicksets, Rose-trees, Peaches, Philbirds, and Plum-trees, if the frosts be not too hard, prune and lop them; before full Moon sow and set Beans and Pease, and hung Land: in the last quarter geld Cattel to rear, fallow Land for Wheat and Rye, drench Cockerns with dung, and remove Bees: and for your own health keep your body warm, let good and wholsom Diet be your Physician, moderate Exercise and Labor your Sawce to cause Appetite.

February Observations.

Sow all sorts of Peale, and other pulse, sow mustard-seed, cast up dikes, set and plant vines, hops, goosberries, and any fruit that grows upon bushes, prune and trim all sorts of fruit-trees from mosse, canker, and all superfluous branches, graft in the latter end of the Moneth, sow onions in cold stiff land, take heed of cold, forbear Phlegmatick meats.

March Observations.

In the new of the Moon (the wind any way but south or west) graft pears, hazels or apple-trees, make an end of sowing all manner of pulse, and begin to sow oats, barly, parsnips, onions, carrets, cucumbers, melons, and all kinde of pot-herbs, slip Artichoaks and sage; geld lambs, let blood according to strength and necessity, the sign and weather being also fit (but repair to the learned Physitian) look what cannot be cured in the Spring by Physick, will hardly be cured all the year after.

April Observations.

Sow barly, hemp and flax, pole hops, set and sow all kinde of Garden herbs, open bees and let them labor for their living, let Tanners now provide them with bark, and all good Housewives look to their Dairies, bleed and purge with advice, those that are troubled with aches or the gout, let them go to the Bath in this or the three following Moneths.

Perkins. 1657.

May Observations.

Sow barley on all light lands and bearing-grounds, and likewise hemp and flax, and all manner of fine seeds and hearbs, take Lambs from their dams, stir land for wheat and rye, leave lopping of trees, teach hops to climb, but cut off the superfluous branches, rise early, walk the fields, especially by running streams, sage and sweet butter is now an excellent breakfast, sage and clarified whey, as also scurvy-grass-ale, and wormwood beer are wholsom drink to be drunk fasting.

June Observations.

Shear sheep, bring home fewel, weed corn and gardens, set rosemary, cornations and gilly-flowers, sow lettice and radish-seed three or four days after the full, for then they will not run to seed, make hay, carry sand, lime, marl and manure of what kinde soever befitting your land, cut neither hedge nor tree in this and the two next Moneths, beware of great thirst, use thin and light dyet, moderate exercise, and chast thoughts.

July Observations.

Make your hay, and house it while its fair weather, pull hemp that is ripe, gather garden-beans, get rue and wormwood, and gaul to strow on your flowers to destroy moths and fleas, fence your copses, use moderate dyet, take heed of great thirst, for nothing bringeth the pestilence or pestilent diseases sooner then extream thirst, and fervent heads, and cold taken suddenly upon them, take no Physick, bleed not but upon all violent occasions.

August Observations.

Follow close your corn harvest, sow winter herbs in the new of the Moon, gather garden-seeds, mow barley and oats, gather your Summer-fruits, refrain from sleeping in the day time after meat, avoid riot and excess.

September Observations.

In the beginning of this Moneth and end of the former, gather hops when they are brown, the weather being fair and no dew on the ground, kill bees, make verjuice, sow wheat and rye, remove and set all slips of flowers between the two Lady dayes, put swine to mast, remove trees every new Moon from September till February, especially in the new of the Moon, the weather fair and warm, wind south or west, use Physick moderately, forbear fruits too pleasant or rotten, shun ryot and excess of diets.

October Observations.

Sow wheat and rye, the sooner the better for fear of rain, set acorns and nuts, gather winter fruit, the weather dry in the afternoon, and in the wain of the Moon, cut rose-trees if you desire to have store of roses, do this once in two years, refuse not any needful Physick at the hands of the learned, and use all moderate sports to revive the vital Spirits.

November Observations.

Make malt, kill hogs, trench gardens with dung, set crab-tree-stocks, sow wheat and rie in exceeding hot sandy grounds, cut down timber for plows, carts, and other implements for husbandry, use wholsom meat and drink, with good exercise to preserve health.

December Observations.

In this and the next moneth cut down timber, in the last quarter of the Moon uncover the roots of fruit-trees: set beans and pease, cover all the best flowers and herbs from frosts and storms with old rotten horsedung, look well to your cattel, water and keep moist your meadows, let horses blood and drink good wine and strong drink, keep thy body warm clad, thy house warm and dry, cast all care from you, and relieve those that are in want with thy charity: Thus I have ended these Observations which are laid down for thy advantage, make good use of them, and give God the Glory. Vale.
